# Overview

The MGate 5114 is an industrial Ethernet gateway for Modbus RTU/ASCII/TCP and IEC 60870-5-101/104 network communications.

# Package Checklist

Before installing the MGate 5114, verify that the package contains the following items:

- 1 MGate 5114 gateway
- 1 serial cable: DBL-RJ45F9-150
- Quick installation guide (printed)
- Warranty card

Please notify your sales representative if any of the above items is missing or damaged.

#### Optional Accessories (can be purchased separately)

- CBL-F9M9-150: DB9-female-to-DB9-male serial cable, 150 cm
- CBL-F9M9-20: DB9-female-to-DB9-male serial cable, 20 cm
- CBL-RJ45F9-150: RJ45-to-DB9-female serial cable, 150 cm
- CBL-RJ45SF9-150: RJ45-to-DB9-female serial shielded cable, 150 cm
- Mini DB9F-to-TB DB9: Female-to-terminal-block connector
- DK-25-01: 1 DIN-rail kit with 2 screws
- WK-36-02: Wall-mounting kit, 2 plates with 6 screws
- CBL-PJTB-10: Non-locking barrel plug to bare-wire cable

### **Hardware Introduction**

#### **LED Indicators**

#### Agent Mode:

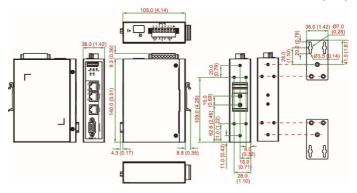

| LED   | Color | Description                                       |  |  |  |
|-------|-------|---|--|--|--|
| Ready | Off   | Power is off or a fault condition exists          |  |  |  |
|       | Green | Steady: Power is on, and the MGate is             |  |  |  |
|       |       | functioning normally                              |  |  |  |
|       | Red   | Steady: Power is on, and the MGate is booting     |  |  |  |
|       |       | up  |  |  |  |
|       |       | Blinking slowly: Indicates an IP conflict, or the |  |  |  |
|       |       | DHCP or BOOTP server is not responding            |  |  |  |
|       |       | properly  |  |  |  |
|       |       | Flashing quickly: the microSD card failed         |  |  |  |
| MB*   | Off   | No serial communication with Modbus device        |  |  |  |
|       | Green | Normal Modbus serial communication in             |  |  |  |
|       |       | progress  |  |  |  |
|       | Red   | An error in serial communication occurred         |  |  |  |
|       |       | When the MGate 5114 acts as a Modbus              |  |  |  |
|       |       | RTU/ASCII master:                                 |  |  |  |
|       |       | 1. The slave device returned an error             |  |  |  |
|       |       | (exception)                                       |  |  |  |
|       |       | 2. Received a framing error (parity error,        |  |  |  |
|       |       | checksum error)                                   |  |  |  |
|       |       | 3. Timeout (the master sends but no               |  |  |  |
|       |       | response)   |  |  |  |

|      |       | When the MGate 5114 acts as a Modbus<br>RTU/ASCII slave:  |
|------|-------|---|
|      |       | <ol> <li>Received an invalid function code<br/>The master accessed an invalid register<br/>address or coil address</li> <li>Received a framing error (parity error,<br/>checksum error)</li> </ol>  |
| 101* | Off   | No serial communication with the IEC 60870-<br>5-101 device   |
|      | Green | Normal IEC 60870-5-101 serial communication<br>in progress  |
|      | Red   | <ul> <li>An error in serial communication occurred</li> <li>When the MGate 5114 acts as an IEC 60870-5-101 master: <ol> <li>Received a slave exception (format error, checksum error, invalid data, slave responds are not supported)</li> <li>Timeout (the master sends but no response)</li> </ol> </li> <li>When the MGate 5114 acts as an IEC 60870-5-101 slave: Received a master exception (format error, checksum error, invalid data)</li></ul> |

\*Only indicates serial communication status; for IEC 60870-5-104 or Modbus TCP status, please refer to the LED indicator on the Ethernet port.

#### Dimensions

Unit: mm (inch)

#### **Reset Button**

Restore the MGate to factory default settings by using a pointed object (such as a straightened paper clip) to hold the reset button down until the Ready LED stops blinking (approximately five seconds).

#### Pull-high, Pull-low, and Terminator for RS-485

Beneath the MGate 5114's top cover, you will find DIP switches to adjust each serial port's pull-high resistor, pull-low resistor, and terminator.

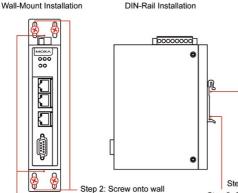

|          | 1         | 2        | 3          |  |
|----------|-----------|----------|------------|--|
| SW       | Pull-high | Pull-low | Terminator |  |
|          | resistor  | resistor | Terminator |  |
| ON       | 1 kΩ      | 1 kΩ     | 120 Ω      |  |
| OFF      | 150 kΩ*   | 150 kΩ*  | -*         |  |
| *Default |           |          |            |  |

#### **Hardware Installation Procedure**

- Connect the power adapter. Connect the 12-48 VDC power line or DIN-rail power supply to the MGate 5114's terminal block.
- Use a serial cable to connect the MGate to the Modbus RTU/ASCII or IEC 60870-5-101 device.
- 3. Use an Ethernet cable to connect the MGate to the Modbus TCP or IEC 60870-5-104 device.
- 4. The MGate 5114 is designed to be attached to a DIN rail or mounted on a wall. For DIN-rail mounting, push down the spring and properly attach it to the DIN rail until it "snaps" into place. For wall mounting, install the wall-mount kit (optional) first and then screw the device onto the wall.

The following figure illustrates the two mounting options:

Step 1: Install wall-mount kit

#### **Software Installation Information**

You can download the User's Manual and Device Search Utility (DSU) from Moxa's website: www.moxa.com. Please refer to the User's Manual for additional details on using the DSU.

The MGate 5114 also supports login via a web browser.

# **Pin Assignments**

#### Serial Port (Male DB9)

| Pin | RS-232 | RS-422/<br>RS-485 (4W) | RS-485 (2W) |
|-----|--------|------------------------|-------------|
| 1   | DCD    | TxD-(A)                | -           |
| 2   | RXD    | TxD+(B)                | -           |
| 3   | TXD    | RxD+(B)                | Data+(B)    |
| 4   | DTR    | RxD-(A)                | Data-(A)    |
| 5*  | GND    | GND                    | GND         |
| 6   | DSR    | -                      | -           |
| 7   | RTS    | -                      | -           |
| 8   | CTS    | -                      | -           |
| 9   | -      | -                      | -           |

\*Signal ground

#### Ethernet Port (RJ45)

| Pin | Signal |  |
|-----|--------|--|
| 1   | Tx+    |  |
| 2   | Tx-    |  |
| 3   | Rx+    |  |
| 6   | Rx-    |  |

#### Power Input and Relay Output Pinouts

| <u> </u>           | V2+         | V2-         | - <sub>1</sub> - |      | V1+         | V1-         |
|--------------------|-------------|-------------|------------------|------|-------------|-------------|
| Shielded<br>Ground | DC<br>Power | DC<br>Power | Common           | N.C. | DC<br>Power | DC<br>Power |
| C. Sund            | Input 2     | Input 2     |                  |      | Input 1     | Input 1     |

# Specifications

| Power Requirements        |   |  |  |
|---------------------------|---|--|--|
| Power Input               | 12 to 48 VDC                              |  |  |
| Input Current             | 455 mA max.                               |  |  |
| Operating Temperature     | Standard models:                          |  |  |
|                           | 0 to 60°C (32 to 140°F)                   |  |  |
|                           | Wide temp. models:                        |  |  |
|                           | -40 to 75°C (-40 to 167°F)                |  |  |
| Ambient Relative Humidity | 5 to 95% (non-condensing)                 |  |  |
| Dimensions                | 36 x 105 x 140 mm (1.42 x 4.14 x 5.51 in) |  |  |
| Reliability               |   |  |  |
| Alert Tools               | Built-in buzzer and RTC                   |  |  |
| MTBF                      | 1,140,815 hrs.                            |  |  |
